

FEMP eTraining Course
Advanced Metering Systems Certificate Series
FEMP53: Metering Benefits and Federal Drivers
1.0 Hr./0.1 CEU
101-level

The U.S. Department of Energy (DOE) Federal Energy Management Program (FEMP) presents the new eTraining course, ***Metering Benefits and Federal Drivers***.

This eTraining outlines federal requirements and drivers for metering and provides best practices for selecting and prioritizing metering projects. Learn to identify and comply with applicable federal metering requirements and evaluate how metered data can be used to improve building performance and reduce costs.

The course is part of FEMP's three-course Advanced Metering Certificate Series, which provides guidance on how to turn information from metered data into operational, cost-saving best practices.

The instructor for this course is Saralyn Bunch, PE, Technical Project Manager for Metering, Product Procurement, and Water at the U.S. Dept. of Energy Federal Energy Management Program.

By completing this course, learners will be able to:

- Understand federal requirements for metering and the value of using metered data
- Support increased compliance with the metering requirements
- Evaluate how metered data can be used to improve building performance
- Apply best practices to select and prioritize metering projects

After completing a course evaluation and multiple-choice assessment, learners will receive a certificate of completion and be eligible for continuing education units.

FEMP eTraining courses are designed for Federal energy and facility managers, but are open to all individuals through the [FEMP Training Search](#).

Courses are hosted in partnership with the National Institute of Building Sciences Whole Building Design Guide at <http://www.wbdg.org/continuing-education/femp-courses>.

Requires Google Chrome, Firefox 4.0+, Internet Explorer 7.0+ or Safari, and the Adobe Flash 9+ plugin.

For more information, visit the [FEMP Training](#) website.
